

Gardening project at Lulworth House Residential Care Home

We have begun a little in-house project here at Lulworth House Residential Care Home to grow our own mini herb and vegetable garden.

Our residents enjoyed thinking about what to plant and where, and then we labelled some lolly sticks so we can keep track of which plant is which.

Everyone has done well, taking it in turns to **water the plants and flowers**, and keeping an eye on things.

We're all looking forward to having fresh vegetables and herbs to enjoy!
